

WHO WE ARE

- Born in the Appalachian Basin and headquartered in Pittsburgh, PA for nearly 130 years, EQT Corporation is one of the top natural gas exploration and production companies in the region
- EQT supports more than 1,900 direct employees and several thousand contractors over a six-state operating region
- EQT's key operations include exploration of productive natural gas deposits, gas extraction through safe and efficient horizontal drilling technology, and gas transportation for delivery to market
- In July 2012, EQT Midstream Partners, LP (EQM), was formed to own, operate, acquire, and develop midstream assets for EQT Corporation and third-party companies
- In 2015, EQT GP Holdings, LP (EQGP), was formed to own the general partner interest, all incentive distribution rights, and a portion of the limited partnership interests in EQM. EQT owns a 90% limited partnership interest in EQGP and 100% of EQGP's non-economic general partner interest

WHAT WE DO

- EQT's core drilling and completions operations are in southwestern Pennsylvania and northern West Virginia; with additional producing wells in Kentucky, Ohio, Texas, and Virginia
- EQT owns or maintains drilling rights to 3.4 million acres of land in the Appalachian Basin, with approximately 630,000 gross acres in our core Marcellus development area
- Together, EQT and EQM own or operate approximately 9,100 miles of pipeline, forming an extensive midstream infrastructure that allows us to gather, transport, store, and market natural gas in the Northeast and Mid-Atlantic United States

HOW WE OPERATE SAFELY

- EQT values safety above all else, requiring employees and contractors to adhere to rigorous safety standards, conducting regular safety training, and monitoring safety performance metrics
- EQT takes precautions to safeguard natural water sources -- utilizing multiple layers of casing and cement in the wellbore and enacting spill prevention plans on well pad locations
- EQT's greenhouse gas management program quantifies and strives to reduce our overall footprint by analyzing production well, pipeline, compressor station, and vehicle emissions

HOW WE GIVE BACK TO OUR COMMUNITIES

- The EQT Foundation, the charitable giving entity of EQT Corporation, is committed to making a difference in its communities by identifying and supporting innovative local programs and initiatives that focus on education, community, environment, and arts and culture
- Since its inception in 2003, the EQT Foundation has contributed more than \$37 million to communities in the Appalachian Basin, awarding more than \$5.5 million to communities in 2015

Where
energy
meets
innovation.
